

Jeremy Monnolly

monnollyj9027@my.uwstout.edu (xxx) xxx-xxxx Menomonie, WI

SUMMARY

Adaptable and motivated Computer Science major at **University of Wisconsin Stout**, proficient in **C++**, **Java**, and **Dart**. Experienced in leveraging **Firebase**, **Docker**, **Google Cloud Console**, and **Google APIs** to build functional, scalable applications—most notably demonstrated in a **capstone calendar app** integrating multiple external calendars (Google, Outlook, etc.). Recognized for a willingness to learn and the ability to thrive in diverse technical environments. Seeking a **Summer 2025 internship** to continue developing innovative solutions and broadening technical expertise in a fast-paced setting.

EDUCATION

University of Wisconsin - Stout | Menomonie, WI
Bachelor of Science, Computer Science (December 2025)

WORK HISTORY

Warehouse Associate

August 2022 - January 2023

Christmas Story Warehouse, xxx, xx

- Maintained a safe, clean, and organized warehouse environment, adhering to strict health protocols.
- Worked extended hours (60+ hours/week) during peak seasons to meet demand of more than a thousand orders per day.

Seasonal Landscaper

May 2021 - August 2021

Landscape Company, xxx, xx

- Collaborated with team members to complete projects on time, fostering a cooperative work environment.
- Showed ability to perform and persevere in harsh work environments such as high heat and humidity

PROJECTS

Jewel Calendar App (Capstone)

Sept 2024 – May 2025

- Developed a cross-platform **calendar app** using **Dart**, **Firebase**, and **Docker**, enabling users to **merge** multiple calendars (Google, Outlook, etc.) into a single interface.
- Optimized real-time syncing by leveraging **Google Cloud Console** and **Google APIs**, supporting a scalable user base.
- Collaborated within a small team over **two semesters**, employing **Agile sprints** to efficiently plan, develop, and iterate on new features.

SKILLS

- **Programming Languages:** C++, Java, JavaScript
- **Tools & Technologies:** Firebase, Docker, Google Cloud Platform, Git, MySQL, VMware, Linux
- **Methodologies:** Agile/Scrum, CI/CD
